NEW JUNIOR INTER-MEDIATE TEACHER

The regular meeting of the trustees of the Mirror Consolidated School District, No. 31, was held in the secretary's office, Saturday evening, July 19, 1924, at eight o'clock.

All members present. The minutes of the previous meeting were read and approved.

The following accounts were presented:

A. J. Roy.....	\$ 5.75
Herald Pub. Co.....	3.00
McCormack Lbr. Co.....	20.80
Chas. Lawson.....	18.30
E. N. Meyer Co.....	3.50

Cairns - Estell: That accounts be paid.

Applications for junior intermediate teacher were read and considered.

Estell - Cairns: That application of Miss Helen Robbins be given first choice, Miss Margaret Englishman second choice, and Miss Vera E. Tollington third choice.

Cairns - Estell: That secretary be instructed to advertise in the Edmonton Journal, and the local paper for a junior for school.

Meeting adjourned.

W. I. Meeting

Hon Irene Parley will address the Women's Institute in the library building on Saturday afternoon, August 2nd, at three o'clock. An invitation is extended to everyone to attend this meeting.

Improvement In Crops

The rain of last Thursday was about the best thing that has happened to this part of Alberta this year. There have been numerous light showers since then, and some of the farmers state that their wheat yields will be fair. Others report little improvement.

Mirror 15; Clive 0

Last Friday evening the Clive baseball team was true to their word and shut out on the local ground by the Mirror Canadian Nationals in a league game, score 15 to 0. Jimmie Cairns made a fine running catch in right field, and Walker was credited with a double play unassisted.

Community Sale.

Harry Lynn, auctioneer, has decided on Saturday, August the 16th, as the date for the big community sale which will be held in Mirror. Any person wishing to put articles up for sale should send in their list to The Journal office at once. Look over your "goods now wanted"—somebody else may buy them.

Mirror Union Church

"O country! Thy way is down no fatal slope,
But up through love and prayer."—Whittier.

11 a.m. Sunday School.

7:30 p.m. Church Service.

"Jesus' Death and Resurrection and More." This will conclude the second series of Sabbath evening addresses relating Jesus to man. A statement will be made regarding the atonement theories.

2:30 p.m.—Combined Church and School in the Ripley school house. As the service will be a special one under the C.F.A., the address will relate itself particularly with rural and national questions.

July 21st.—Ladies' Aid of Mirror Union Church will proceed from the church at 2:00 p.m. to the home of Mrs. H. C. Brewster.

July 31st.—Ladies' Aid of Hickling District will meet at 2:30 p.m. at Mrs. J. E. McLaren's residence.

The Journal—\$2.00 per year.

ONE SOLID WEEK OF BASEBALL

The fortune of the Mirror Canadian National baseball team is being closely followed this week by local followers and others, and if the team comes back, their expectations (which they appear to be doing at this writing) the club will get a lot of notoriety as well as winning considerable money.

The first game was on Monday when the team went to Husky to play a matched game with the Seawall team, but the score, 11 to 2 in favor of Mirror, just about tells the tale as far as the play went. The picked Seawall team never had a look-in.

Applications for the Mirror team journeyed to Red Deer, where they are taking a prominent part in the baseball tournament on Tuesday and Wednesday (today).

The big baseball tournament in Camrose on Thursday, Friday and Saturday will provide the plum of the week's endeavors, and Mirror's strengthened ballplayers will go against some of the best picked teams in this part of the country. The Mirror supporters are satisfied that they should be able to defeat some of the best picked teams in this part of the country.

The draw for the tournament was made at a meeting held on July 15th at Camrose and the following schedule was drawn up:

Tofield vs. Ryley, Thursday, 1:15 o'clock.

Viking vs. Mirror, Thursday, 3:00 o'clock.

The winners of the above games to play off Friday at 1:00 o'clock.

Vegreville vs. Macklin, Friday, 3:00 o'clock.

Camrose vs. Sedgwick, Friday, 6:15 o'clock.

Winners of above games to play Saturday at 1 o'clock.

Final game in tournament to be started at 3:00 o'clock, and winner of Red Deer tournament Saturday evening at 10 o'clock.

The Camrose Canadian has the following to say regarding the teams entered in the tournament.

Ryley is said to have lost last year's pitcher, "Happy" Oslund on their line-up after an absence of several months in the States where he has been pitching in a fast ball league. It will be remembered that Ryley won the Camrose tournament last year, and the same "Happy" was a big factor in their success, pitching all three games played by them.

Tofield has been having good success all season and has won the majority of their games. It is stated that they will be even stronger when they appear at Camrose and will have a few new faces on their line-up.

Mirror (where have we heard that name before?) Oh, yes, they have played a few games here this season and all local fans know something of their ability. Turner is said to be in good form again, having recovered from injuries received at the first of the month, and Walker is going better this year than ever. With players such as Pete Ryan, Buck Lepp and Wagner, Mirror is sure to be in the running. The team has a reputation as wielders of the bickery.

Viking is bringing down a large contingent of supporters who are confident of their team's ability to carry home the bacon.

Macklin is the only Saskatchewan representative, and they will have a heavy burden to carry in upholding the reputation of their province on the ball field. They are fortunate in having a large field from which to secure players and will be here with the best obtainable.

Vegreville is the one dark horse of the tournament. They are being led by no other than A. L. Horton, ex of Observer newspaper fame. If Brother Horton is half as good at baseball

Try "CIPPS" for Your Garden

If it is not doing very good and note the results. "CIPPS" give wonderful results when used for fertilizing Tomatoes, Strawberries, Beans, Peas, Potatoes, Lettuce or Cabbage. Also excellent for Shrubs, Roses, or Fruit Trees.

DEVEREAUX DRUG CO.

Mirror

etting ball players as heils with the pen, we warn the other teams to beware. Any way, he promises a real aggregation of ball tossers, and we venture to predict that he will have it.

Camrose, the unfortunate, the past week has been a disastrous one. Three of the regular players are laid up with injuries and will not be able to play in the tournament. Heck Adam received a broken arm at Tofield on Monday night by being hit with the ball while at bat. Louis Hansen injured two of his fingers in the gears of a pump jack and one had to be amputated just above the first joint. Paulsen is also laid up with a crippled hand and will be out of the game for some considerable time. Sure is a tough old world, but the management of the team is not down-hearted and will field a team that is expected to go far in the tournament.

Sedgwick has had considerable success in their neck of the woods this season, and are reported to be one of the strongest teams along the C.P.R. east line. They played in the New Norway tournament and proved worthy opponents for Tofield, losing out after a nip and tuck struggle by 21. They are said to have added some strength since then and will give Camrose a hard tussle on Friday.

Dennie McLennan, of Winnipeg, will officiate in all games as umpire. He has a reputation of being one of the best arbiters in the game in the west. He will have full charge of the play, his decision will be final with no appeal.

The following rules will govern the tournament:

Deposit to be returned when team appears on schedule time. All games played under American League rules.

Umpire's decision absolutely final.

GRAND THEATRE, MIRROR

PROGRESSIVES WOULD AMEND THE B. N. A. ACT

Ottawa.—A vote of \$450,000,000 to the Canadian National Railways and another of \$50,000,000 to the Canadian Government Merchant Marine, to cover the year's bond commitments, and deficits, were passed by the House of Commons after several hours debate. In which several Progressive members criticized the Senate bitterly for throwing out some of the proposed branch lines on the Canadian National Railways.

W. D. Ester (Liberal, Waterloo), as chairman of the special committee on Canadian National Railways and shipping, reviewed the work of that committee. He expressed increased confidence in Sir Henry Thornton, and the country should assist him in every possible way and hold him responsible for the welfare of the country. The system was constantly improving, and a large measure of the service which had been the object of the purchasers of the Canadian National Railways was now secured.

C. D. Stewart (Progressive, Humboldt) urged the supplementary estimate should be placed in the supplementary estimates for the purpose of conducting further surveys of the branch lines killed by the Senate. He felt that lack of information was one of the reasons underlying the action of the upper house. He said that certain bills providing for branch lines not an ill-fated false elsewhere. Mr. Stewart made an appeal for the treatment of the Canadian National Railways.

C. C. Davis (Progressive, N. Battleford) deplored the efforts he said were being made "in other places" to discredit the Canadian National Railways. "Democratic government in this country is not doing anything to help the railroads," he said. "The railroads are being run by a few men, and they are not doing anything to help the people." He said that the railroads were being run by a few men, and they are not doing anything to help the people.

Hon. G. P. Graham said these things could only be done in a constitutional way. He feared there was no way that the branches turned down by the Senate could be built this year, unless the B.N.A. Act were changed. There was a chorus of shouts from the Progressive benches: "Let us change the B.N.A. Act then."

Revival In Grain Trade

\$1,000,000,000 Added To U.S. Wealth
By Grain Advances

Chicago.—Upwards of \$1,000,000,000 has been added to the agricultural wealth of the country as a result of grain advances in the last month, local grain men estimated.

There has been no such revival in the grain trade in so short a time in many years. Forward contracts are being made for wheat at prices that have to be kept upwards of 25,000,000 bushels of wheat futures in Chicago and Winnipeg within a short time.

All cereal futures are expected to be higher here, were quoted here at new high prices for the crop, with wheat closing at 120½ for September, September, 121½, and December at 132. Strength at Winnipeg was a contributing factor in the advance.

New Grain Shipping Scheme

Edmonton, Alta.—Full particulars about the new grain shipping scheme that Hon. George Howland brought back with him from England were reported by the minister to L. V. Wood, chairman of the Alberta Wheat Pool. Involved in this scheme is a system of grain storage in government elevators in England, and wheat from Alberta, shipped via the Panama Canal, will be especially convenient.

Will Not Change Bankruptcy Act

Ottawa.—The Government does not contemplate bringing in any further legislation this session, said Premier King in the House of Commons, answering a question as to whether or not the amendment to the Bankruptcy Act recommended by the Senate and Commerce Committee would be before the House this session.

Will Issue New Note

Berlin.—The bill for establishment of the new gold note bank has been completed and submitted to the Reparations Commission under the plan of the reparations experts' committee. The Government will issue a new gold note bank with the face value of ten marks and upwards.

Would Close Hostility

New York.—Assistant United States Attorney Lyman H. Ward announced he will seek an injunction to close for one year the Ritz Carlton Hotel, a war-ruined establishment, on the ground that this hostility is a common nuisance.

W. N. U. 1534

British Millers Forced To Advance Price Of Flour

London.—The ninth increase in the price of flour since May first was announced today. Gaining by wheat futures in the United States, British millers declare that they are forced to raise the price of wheat. The increase in the price of wheat, which is, they say, the direct result of manipulations on the Chicago and Winnipeg grain exchange. Since the beginning of May the price of flour has advanced more than six shillings a sack.

Alpine Club Will Camp In Rockies

Canada.—The Alpine Club of England, U.S.A. will be in the Rockies. The annual meeting of the Canadian Alpine Club will be held at the foot of Mount Robson, north of the Rockies, on Tuesday, July 31, according to information reaching Winnipeg members of the club. The Alpine Club of England, U.S.A. will be in the Rockies. The annual meeting of the Canadian Alpine Club will be held at the foot of Mount Robson, north of the Rockies, on Tuesday, July 31, according to information reaching Winnipeg members of the club.

Outlying camps are to be placed at the base of the mountain. The camp on Mount Robson, to give access to Moose Pass and the uplands surrounding this region. A camp will also be placed at timber line on Mount Robson, in charge of Conrad Cain, celebrated guide, who led the ascent of Mount Robson in 1915. This winter camp will be for the purpose of facilitating attempts to reach the peak of this, the highest mountain in the Canadian Rockies.

It is anticipated that one or more members of the Alpine Club of England, U.S.A. will be in the Rockies. The annual meeting of the Canadian Alpine Club will be held at the foot of Mount Robson, north of the Rockies, on Tuesday, July 31, according to information reaching Winnipeg members of the club.

Postal Employees' Troubles

No Change in Terms of Reinstatement Has Been Made

Toronto.—No change in terms of reinstatement of the postal employees who went out on strike was made as a result of the visit of the Hon. J. H. Patterson, minister of the interior, to the postal employees at Ottawa. It was announced that the officers returned to the city. The executive of the union will be in attendance at a meeting at which the officers' report will be discussed.

"There is no change," said one of the officials, and there is nothing to be said at the present time.

"I can't say. There is nothing to be said at the present time."

Believe Coast Indian Victim Of Foul Play

Well Known Chief of Squamish Nation Dies at Vancouver

Vancouver.—Chief Jimmy Harry, one of the best known chiefs of the Squamish Nation, is dead. He was investigating the possibility of foul play. The Indian was picked up in the east end of the city in an unconscious condition from head injuries and sent to the hospital. Recently an award of more than \$8,000 was made to the Indians of Chief Harry's tribe to serve as a bridge construction company for use of reserve property and police believe that robbers attacked the Indian couple to find a sum of money on his person.

Plan Reception For Squadron Crew

Ottawa.—A movement has been started and is receiving encouragement to have the crews of the special police squadron take part in a triumphal march through the streets of London in honor to give citizens of the capital the opportunity of welcoming them after their tour round the world.

\$50,000 From Vancouver

Ottawa.—The bill providing for advance \$50,000 from the Vancouver Harbor Commission for work on terminal facilities was given third reading in the House of Commons. The Toronto Visited Bill also received second reading after considerable discussion.

May Test New Treaty

Boston.—The liquor treaty recently signed with Great Britain under which a vessel carrying liquor, and within a certain limit, may be allowed to enter United States ports, may be tested, is expected to be tested as a result of the capture of Race Point of the Canadian schooner *Fraser Louie*.

May Be Election Issue

Immediate Completion of the H. B. Railway Will Be Demanded

Winnipeg.—The Government's decision regarding the completion of the Hudson's Bay Railway, as given out by Hon. George Graham, minister of the interior, shows that it has not gone back on the Laurier Government's decision that the railway was a decided factor for the benefit of Western Canada as a whole, and that Mr. Graham still hopes to have the honor of driving the last spike.

This is the opinion of the executive of the Hudson's Bay Association, as voiced by Col. R. H. Webb here. Col. Webb commented on the Government's major's meeting in the House at present, and declared:

"We know that if the situation remains unchanged the next election will be fought in the west on the issue of the immediate completion of the Hudson's Bay Railway, and by a solid western party, which will be pledged that the west shall have the railway completed. It will be a Pro-Canadian party, but a western party, that will insist on having its platform carried out to the letter."

Col. Webb said the association would call a general meeting to determine its future policy shortly.

THE SENATE HAS FINISHED WITH BRANCH LINES

Ottawa.—The Senate finished with the Canadian National branch lines in passing the remaining bill, providing for a two-mile line in Quebec. The programme passed in the House comprised 25 bills. Of this number, in the Senate, eight have been killed and the remainder passed.

The provision that suffrage must be in the Senate, eight have been killed and the remainder passed. The provision that suffrage must be in the Senate, eight have been killed and the remainder passed.

It is anticipated that one or more members of the Alpine Club of England, U.S.A. will be in the Rockies. The annual meeting of the Canadian Alpine Club will be held at the foot of Mount Robson, north of the Rockies, on Tuesday, July 31, according to information reaching Winnipeg members of the club.

Many Changes Approved

House of Commons Gives Third Reading To Important Bills

Ottawa.—Third reading has been given to the Militia Act affecting the conditions under which the militia may be called out to preserve order in the case of industrial disputes; the bill containing amendments to the Soldiers' Civil Re-establishment Act recommended by the special committee on pensions; and the bill consolidating the laws and regulations governing quartz mining in the Yukon Territory.

The House has also concurred in the Senate amendments to the Indian Act.

Factory Inspector Dies

Vancouver.—Messrs. Winifred Macdonald, factory inspector for the mining wage board and for several years a well known labor leader, died here following a brief illness. For three years he was President of Vancouver Garment Workers' Union.

Would Suspend Preference

Ottawa.—The Senate has given third reading to the bill authorizing the Government to suspend the preference given to British goods by the British Government, to suspend the British Preference.

Dead Bandit's Brother Sentenced

Winnipeg.—Mike Kuzma, a brother of Jim Kuzma, who was shot and killed when he refused to surrender to the police, was sentenced in police court to six years in the penitentiary following his conviction on charges of shopbreaking and carrying a revolver.

Quebec Convent Destroyed

Quebec.—The convent of congregation St. Paul, was completely destroyed by fire which broke out in the northern section of the building. The loss is estimated at \$100,000, partly covered by insurance.

Canada Represented

London.—Senator N. A. Belcourt, of Ottawa, arrived as envoy extraordinary and minister plenipotentiary for the Dominion of Canada at the Inter-Allied conference which opened here July 16.

For Imperial Preference

Immediate Completion of the H. B. Railway Will Be Demanded

Winnipeg.—The Government's decision regarding the completion of the Hudson's Bay Railway, as given out by Hon. George Graham, minister of the interior, shows that it has not gone back on the Laurier Government's decision that the railway was a decided factor for the benefit of Western Canada as a whole, and that Mr. Graham still hopes to have the honor of driving the last spike.

This is the opinion of the executive of the Hudson's Bay Association, as voiced by Col. R. H. Webb here. Col. Webb commented on the Government's major's meeting in the House at present, and declared:

"We know that if the situation remains unchanged the next election will be fought in the west on the issue of the immediate completion of the Hudson's Bay Railway, and by a solid western party, which will be pledged that the west shall have the railway completed. It will be a Pro-Canadian party, but a western party, that will insist on having its platform carried out to the letter."

Col. Webb said the association would call a general meeting to determine its future policy shortly.

Prohibition Is Defeated

Saskatchewan Votes For Government Control Of Liquor

Regina.—Prohibition in Saskatchewan was decisively defeated as a result of the plebiscite, and a substantial majority was registered in favor of Government control of the sale of liquor.

Prohibition was defeated in all the seven cities of the province, the majority in favor of a change in the liquor system varying from Regina's 4,910 to 56 in North Battleford.

It is anticipated the Provincial Legislature will meet early in the fall, probably some time in October—to pass the necessary implementing legislation changing the liquor law of the province. Until the change has been actually effected the Attorney-General has made it plain there will be no relaxation in the enforcement of the Saskatchewan Temperance Act.

Doukhobors Badly Burned In Fire

Eleven In Nelson Hospital Fought For Lives

Nelson.—No human lives were lost though 24 houses probably perished, in the Portage Creek fire near here. The four missing Doukhobor women have been found. Eleven badly burned Doukhobors are in the Nelson hospital, mostly burned about the head. When the fire overtook the score or more men at Camp Number 2, some took to the creek, immersing themselves, and some to the flume. Then the flume was burned higher up, its few steps and the men had to fight for their lives.

Many Changes Approved

House of Commons Gives Third Reading To Important Bills

Ottawa.—Third reading has been given to the Militia Act affecting the conditions under which the militia may be called out to preserve order in the case of industrial disputes; the bill containing amendments to the Soldiers' Civil Re-establishment Act recommended by the special committee on pensions; and the bill consolidating the laws and regulations governing quartz mining in the Yukon Territory.

The House has also concurred in the Senate amendments to the Indian Act.

Factory Inspector Dies

Vancouver.—Messrs. Winifred Macdonald, factory inspector for the mining wage board and for several years a well known labor leader, died here following a brief illness. For three years he was President of Vancouver Garment Workers' Union.

Would Suspend Preference

Ottawa.—The Senate has given third reading to the bill authorizing the Government to suspend the preference given to British goods by the British Government, to suspend the British Preference.

Quebec Convent Destroyed

Quebec.—The convent of congregation St. Paul, was completely destroyed by fire which broke out in the northern section of the building. The loss is estimated at \$100,000, partly covered by insurance.

Canada Represented

London.—Senator N. A. Belcourt, of Ottawa, arrived as envoy extraordinary and minister plenipotentiary for the Dominion of Canada at the Inter-Allied conference which opened here July 16.

Crow's Nest Pass Agreement Is Cause Of Complaints

Ottawa, Ont.—The Railway Commission now will need to be looking into the general question of discrimination arising out of the coming into effect of the Crow's Nest Pass agreement. The Commission is already claiming. One is from eastern firms complaining of wide disparities between rates on lines in their territory on shipments to the west, while another arises from the position of the Canadian Pacific Railway that on lines in the west, constructed subsequently to the Crow's Nest Pass agreement, complaints are piling up.

Discuss H. B. Road

Ottawa.—Arguments for and against completion of the Hudson's Bay Road will occupy the attention of the House of Commons.

On a Government motion to go into supply, Mr. Knox moved the failure to complete the railway had resulted in a serious loss to Western Canada. The construction of the building of a railway to Port Nelson and the establishment of marine terminals at that point were urged by Mr. Knox and endorsed by Rev. T. W. Lloyd (Progressive, Nelson, Manitoba) who said that the Government ought to defend its attitude on the Hudson's Bay route.

The element of doubt and suspense which the Government had permitted to creep into the Hudson's Bay controversy, he thought more formidable than the biggest iceberg that ever floated in the Hudson's Bay. Canada would know where to go or not when, the Hudson's Bay Railway would be completed.

Sir Henry Drayton (Conservative, West York) spoke of some logic on the pros and cons of the question. If he thought the project was feasible, he would not be the first to advocate it. But there should be the most searching investigation before any commitment was made.

WILL CONFER WITH PROVINCES ON PENSION PLAN

Ottawa.—A reference to the Supreme Court to secure an opinion as to whether the Dominion or the provinces have jurisdiction in regard to the eight-hour day was recommended by the House of Commons by the select committee on Industrial and International relations in its second and final report.

The report was made as the result of an investigation in the committee of the jurisdiction of the Federal and Provincial Parliaments in regard to the draft convention passed at the Washington conference in regard to the eight-hour day on industrial undertakings.

The Dominion Government will communicate with the provinces during the coming recess in regard to the establishment of a system of old age pensions. Premier King stated in the House. He said he understood the old age pensions committee's report contemplated co-ordination of action between the provinces and the Dominion providing for a pension of \$20 a month, of which half is to be contributed by the province in which the pensioner resides.

The Premier again was unable to give a definite reply as to the fate of the alternative vote bill.

Canada has been invited to attend a conference late this year to discuss trade-imperial relations with the British Government and other Dominions, the Premier announced.

Trade Pact With Belgium

Ottawa.—The Senate gave consideration to the trade convention between Canada and Belgium. This convention was adopted and received its third reading.

Valera Is Set Free

London.—Eduardo de Valera and Austin Stack, Irish Republican leaders, were released from prison by the Irish Free State Government, according to a News Agency despatch from Dublin.

U.S. Flyers In England

Brough, Yorkshire, Eng.—The three United States army around-the-world airplanes arrived here from Crofton. Their planes will rest here a week or ten days while the pilots are being fitted in preparation for their jump to the Orkney Islands.

Cuba has an Almost Inexhaustible Supply of Copper

The Cumberland River, 600 miles long, is navigable for 200 miles.

FACTORS WHICH HELP TO MAKE CANADA GREAT

London.—How advertising has helped to build the Dominion of Canada was told by E. W. Beatty, B.C. president of the Canadian Pacific Railway Company, in an address at the convention of the Associated Advertising Clubs of the World.

Mr. Beatty said that the advertising which Canada obtained was not always such as Canadians desired. He quoted a line from "Our Lady of the Shores," had a great many people the impression that Canada was entirely surrounded by the Arctic region, but British visitors to the Dominion often were most impressed, not by the snow, but by the fact that an extraordinary amount of ice cream comes consumed by Canadians.

Canada's snow and hard winters, Mr. Beatty said, were among the Dominion's greatest assets, producing hard wheat and turn and water transport for lumber, and the virtue, sturdy, manhood which the whole world, particularly since the achievements of the Canadian army in the Great War, has admired and identified with the Canadian race.

Mr. Beatty dwelt on the part played by advertising in the building up of Canada since the days of the French regime, when the Jesuit missionaries acted as advertisers.

"If success," Mr. Beatty continued, "the Canadian nation must be composed of many races, races which will know where to go or not when, the Hudson's Bay Railway will be completed."

Montreal Still Leads

Reported Record of Grain Exports Well Ahead of Vancouver

Montreal.—Vancouver has not yet outdistanced Montreal in the matter of grain exports, as was recently stated in despatches from the latter city. Montreal retains her position as the premier grain shipping port of the continent. During the ten months ending June 30, 1924, Vancouver shipped out 50,951,000 bushels of wheat, according to the despatch. Montreal shipped out 50,951,000 bushels of wheat, according to the despatch. Montreal shipped out 50,951,000 bushels of wheat, according to the despatch.

Otto Von Bismarck In Airplane Crash

Machine Was Smashed But Prince Not Seriously Injured

Berlin, Germany, June 29.—Otto Von Bismarck, grandson of the former Chancellor, and recently elected to the Reichstag, crashed in an airplane while on his way from Berlin to Nuremberg where he intended to attend an aviation meeting, according to word received here. Bismarck, the Prince, who is an experienced flyer, having served in the aviation corps during the war, was not seriously injured, but abandoned the trip. The machine was smashed.

Ottawa to Vote on Liquor Issue

Toronto.—Liquor options will pass upon the liquor issue on Thursday, October 23 next. Decision to hold a plebiscite upon that date has been reached by the government, and represents fulfillment of Premier Ferguson's election time pledge of a vote for the people. If and when public opinion demands it.

U.S. Flyers In England

Prairie Game Resources

Pleanty of Scope for the Sportsman in Any Part of Western Provinces

A very general statement is made by the game resources of Canada, as evidenced by the heavily involved province of the Western provinces, which is a long way from being the actual truth. The attractions of the prairie provinces to hunters and sportsmen are not as well known here as the subsequent stages of that territory are largely overshadowed by the richness it has achieved in agricultural production and because this area is not as anything like as large an extent visited by sportsmen from other countries. As a matter of fact, few areas have greater or more varied attractions to the sportsman, certainly no agricultural production, and because this area is not as anything like as large an extent visited by sportsmen from other countries. As a matter of fact, few areas have greater or more varied attractions to the sportsman, certainly no agricultural production, and because this area is not as anything like as large an extent visited by sportsmen from other countries.

That the game resources of the prairie provinces, which stand up as an agricultural area and belonging to a western manner to the farmer, are not as anything like as large an extent visited by sportsmen from other countries. As a matter of fact, few areas have greater or more varied attractions to the sportsman, certainly no agricultural production, and because this area is not as anything like as large an extent visited by sportsmen from other countries.

Even in the most settled districts of the prairie provinces (in fact, most game birds increase with settlement), the prairie chicken, partridge and wild duck are to be found in large numbers. Through the wild game birds, which are to be found in large numbers, the prairie chicken, partridge and wild duck are to be found in large numbers. Through the wild game birds, which are to be found in large numbers, the prairie chicken, partridge and wild duck are to be found in large numbers.

The balance is scarcely less elaborate and attractive. A park of what the prairie provinces offer to the sportsman is scarcely less elaborate and attractive. A park of what the prairie provinces offer to the sportsman is scarcely less elaborate and attractive. A park of what the prairie provinces offer to the sportsman is scarcely less elaborate and attractive.

As indicated in the figure, there is a variety of big game hunting on the prairie. Moose and elk are to be found in large numbers, the prairie chicken, partridge and wild duck are to be found in large numbers. Through the wild game birds, which are to be found in large numbers, the prairie chicken, partridge and wild duck are to be found in large numbers.

The game resources of the prairie provinces are not only rich and varied, but they are also abundant. A park of what the prairie provinces offer to the sportsman is scarcely less elaborate and attractive. A park of what the prairie provinces offer to the sportsman is scarcely less elaborate and attractive. A park of what the prairie provinces offer to the sportsman is scarcely less elaborate and attractive.

A Mammoth Trout Taken from the waters of Lake Winnipegosis, a trout that weighed 25 pounds, is now being mounted by taxidermists and will be placed in the British Museum. It is 42 inches long and 25 inches in circumference. Many good trout have been caught in the lake this year, but none as large as this beauty. These lake trout in the Winnipegosis waters are one of the wonders of the Rockies. It is said to be the only lake trout in the world that has been caught in the Winnipegosis waters.

Future of Gold Mining By the end of the next year, it is estimated that the ore in sight in Northern Ontario, waiting to be mined, will amount to a total value of \$25,000,000 annually. The production of gold is estimated to be \$25,000,000 annually. The production of gold is estimated to be \$25,000,000 annually. The production of gold is estimated to be \$25,000,000 annually.

Maori Miracle Man Treats Europeans

Receives Vast Mail But Never Speaks Personally to White People

A wealthy Maori, Huihara, and his wife, Huihara, have arrived in London from New Zealand with his family and thirty-five Maori, most of whom he is said to have cured of disease or disability. Huihara, who is about fifty years of age, is a man of fine physique who claims high descent. He has never been cured of a disease or disability, but he has cured many others.

Mr. Huihara, as man of education, speaking fluent English, Huihara's recovery and disciple, said that Huihara only deals personally, but he treats white people by correspondence. "Since 1911 he has received 16,000 letters from Europeans all over the world, and 10,000 of these people have written to say that they were cured."

He began healing as a result of an experience with his own child, who was ill. He began healing as a result of an experience with his own child, who was ill. He began healing as a result of an experience with his own child, who was ill.

Letters To The Editor The most common letter to the editor is the one that is too long. Writers of letters should practice the art of conciseness. A certain French writer once wrote a postscript at the bottom of a long letter, saying "Excuse the length of this letter. I had not time to write a shorter one."

Orange Culture in Africa Orange culture is an interesting venture of the late few years in South Africa. Some of the orchards that have been planted there are among the largest in the world. The orange growers of South Africa are exporting seven million boxes of oranges a year.

Sugar is found in the sap of nearly 200 varieties of trees and plants. The most common is the sugar cane. The most common is the sugar cane. The most common is the sugar cane.

Wasted Waterpower

World Has Vast Treasure House of Unexploited Energy

Without the building of a dam or reservoir, there is now turning down our mountain sides and through our valleys water power sufficient to turn nearly every wheel of industry, light and heat our homes, operate our locomotives and drive the ocean liners across the seas.

A recent report of the United States Geological Survey estimates the total waterpower of the world, without storage and at low water, to be 40,000,000,000 horsepower. It also states that, if the power could be extracted from every rainfall falling upon this planet at its heaviest, it would be 10,000,000,000,000,000 horsepower.

When we consider that the amount of energy used now the world over for every conceivable purpose is less than 10,000,000,000 horsepower, the thought of this vast treasure house of untapped energy is staggering. It is a vast treasure house of untapped energy.

Adding to Human Knowledge

Men Who Failed to Scale Mount Everest Have Healed Their Success

Mount Everest is still the unconquerable. The snow-covered peaks of George Lodhi, Nanda Devi, and A. C. Irvine, three mountaineers who attempted the summit, mark the end of the last British expedition towards the heights of this holy peak of the Himalayas. Although these brave Englishmen have failed they have gained the knowledge that the mountain is still unconquerable.

Under the history of exploration, men have faced greater physical difficulties than those found in the attempt to scale Mount Everest. Under the history of exploration, men have faced greater physical difficulties than those found in the attempt to scale Mount Everest.

Qualified To Criticize Gene Stratton Porter, the popular American novelist, has an article in a current magazine in which she attacks vigorously her recently published translation of the New Testament into modern English, by Professor George Howard, of the University of Toronto.

Prohibition In Russia

Unique Methods Are Adopted to Enforce Prohibition

Russia has undertaken to solve the prohibition problem in her own way, and, according to her officials, is succeeding in two respects. A marked decrease in the manufacture and consumption of samogonka, a Russian home-brewed vodka, is attributed to the two measures.

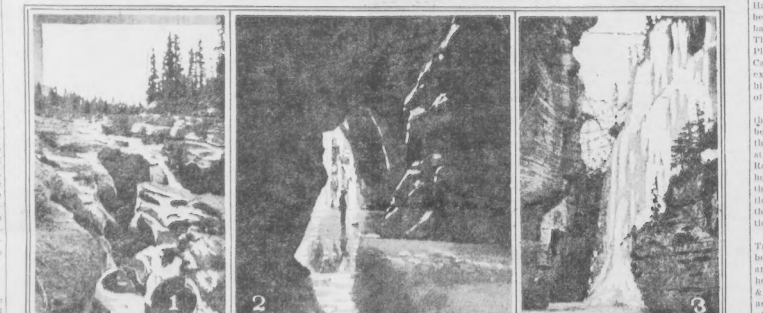

Seventy-five per cent. of the fines collected from bootleggers and moonshiners is turned over to the militia or to the city or district where the violation is discovered. Since this scheme went into effect the enthusiasm of the militia to enforce the prohibition law has been greatly increased.

From time to time the committees send propaganda lectures, with much of the moonshiners as well as the bootleggers. The entire committee is made up of the militia and the police. The entire committee is made up of the militia and the police.

When you are drunk you don't know what you are doing, and you break your plates and pots and smash money for new ones. All this is caused by the samogonka, which is the cause of all your stupidity and has a big big.

ONE OF NATURE'S WONDERS

The Devil's Potholes From the illustrations which show the narrow gorges in the canyon, it is evident that the water has cut its way through the rock in a most remarkable manner. The water has cut its way through the rock in a most remarkable manner.

Entrance to Cave, Maligano Canyon The Devil's Potholes, curious indentations in the solid rock over which the Maligano River flows before the canyon was worn to its present depth, are holes worn deep in the surface rock by the action of swirling flood waters, when a large tree has been whirled round and round in an eddy, until the stone itself has been worn into a bowl.

The Canyon in Winter Lake, the Hudsons of the Cayll mountain range and hundreds of others, Wild animal life is abundant, and the calm peace of the out-of-doors is assured to the lived holiday-seeker. In addition to the natural beauty of the park, a comfortable hotel, with excellent cuisine and all the comforts of the modern city hotel, provides a starting point from which parties may radiate by motor or packhorse or afoot to travel by motor road or pack trail into the heart of the wilderness.

Output of Butter in Saskatchewan Saskatchewan's creamy butter has won a reputation of May the output of 250,000 tons, as compared with 241,000 tons in the same month a year ago, an increase of 9,000 tons, according to a statement made by the Provincial Dairy Commissioner. The cumulative production for the first five months of the current year is 1,325,000 tons, which compares very favorably with the corresponding period in a year ago, when the total was 1,277,000 tons.

Grammar First Publisher—In your story I notice you make the owl look to whom it belongs to "to whom." Author—"Yes, but this is a Boston owl."

Canada's Worst Advertisement For Business Sagacity Is The Record Of Forest Fires

(By Reuben Black)

The best advertisement for the business sagacity of Canada is the record of forest fires. What the loss of logging inventories to throw in with all the rest of the year's production of lumber and firewood is to the forest industry is to the nation's economy. It is a record of the failure of the forest industry to protect its own interests. It is a record of the failure of the forest industry to protect the interests of the nation.

Seventy per cent. of the forests of Quebec are the property of the government. The loss of these forests is a loss of the nation's wealth. It is a loss of the nation's future. It is a loss of the nation's security. It is a loss of the nation's honor. It is a loss of the nation's soul.

The public is absolutely aware of the forest. Whether we shall sweep down to bankruptcy or make the forest industry our own, it is up to us. It is up to us to protect the forest. It is up to us to protect the nation. It is up to us to protect the future. It is up to us to protect the soul.

It is the failure of the forest industry to protect the forest. It is the failure of the forest industry to protect the nation. It is the failure of the forest industry to protect the future. It is the failure of the forest industry to protect the soul. It is the failure of the forest industry to protect the forest.

The people of Canada own 80 per cent. of the forest. The loss of these forests is a loss of the nation's wealth. It is a loss of the nation's future. It is a loss of the nation's security. It is a loss of the nation's honor. It is a loss of the nation's soul.

A hundred years ago a forest fire was perhaps inevitable but in 1923 the forest industry was not. It was a failure of the forest industry to protect the forest. It was a failure of the forest industry to protect the nation. It was a failure of the forest industry to protect the future. It was a failure of the forest industry to protect the soul.

Tourist Traffic Increase

Traffic From U.S. to Canada Has

Tumbled Within Last Three Years

Tourist traffic from the United States into Canada has tumbled within the last three years, according to J. B. Harkin, Canadian Government Commissioner to the Dominion Parliament, who made the statement in a recent address before the Ottawa Rotary Club. In 1921 the number of American tourists who entered Canada was 102,963; in 1922, 94,632; and in 1923, the number had reached 102,963. Mr. Harkin said that in the past five years 191 million dollars had been spent on roads in Canada, but that 118 million dollars of foreign tourist traffic had been brought in which represented a large loss on capital expenditure.

Grain Receipts At Lakeside

Grain receipts at the wharves of the lakes for the period from September 1st, 1922, to June 6, 1923, totaled 328,252,612 bushels, an increase of 291,429,193 in the corresponding period a year ago, an increase of 46,932,424 bushels.

England will have another actress M.P. if Miss Olga Netherland succeeds. It is her ambition to be elected to the House of Commons. Since retiring from the stage Miss Netherland has devoted herself to work in connection with the People's League of Health.

Timely Suggestions

Seasonable Hints Which Are Worth Studying By Farmers

Seasonable hints issued by the Dominion Experimental Farms, among which are the following: Good markets can seldom be gained, and most certainly can never be held, unless our products show top quality.

Canada's per capita consumption of home products is not nearly as large as it might be. We are farmers to produce, pack and attractively display such things as the Canadian consumer must desire.

For the feeding of steers or beef cattle barley has a high commercial value. The suitability of barley for human production has been repeatedly demonstrated; but it is not a desirable feed for livestock before harvesting or during the early part of the nursing period; nor should it be fed to newly weaned pigs on any appreciable quantity.

Experiments at Napier, N.S., show that the average breeder with a produce can receive 100 per cent. more for a two-year-old hog than for a one-year-old to the average breeder about 5,000 pounds at the same age.

In choosing a dairy herd, pure breeding, size, conformation, quality and record backing should be given first consideration. In staling up the herd record on pedigree, it should be remembered that the important records are those close up. If improve more in the herd, it should be remembered that the important records are those close up.

The vegetable garden and seed plots at this season of the year require particular attention. Care should be given to the selection of seed, and to the selection of seed, and to the selection of seed.

The storage life of an apple depends largely on the treatment it receives during the six to eight weeks following the time it is picked. At present, or common storage houses offer a relatively cheap, and when properly handled, and when properly handled, and when properly handled.

Curious or improper methods of curing alfalfa and other forage may result in a loss of as much as fifty per cent. of the nutritive value. The use of hay by the farmer and the disposal of hay by the farmer and the disposal of hay by the farmer.

Livestock Train A Success

Attendance Far Exceeded Previous

Trains Says Mr. Robertson

The Livestock Train for livestock traffic completed on July 5, a most successful first trial, covering 1,755 miles, and the total attendance, which, according to Mr. J. G. Robertson, livestock commissioner, amounted to 40,329, far exceeded the attendance at either of the two previous livestock train trials. The attendance at the first trial was 10,000 and at the second trial was 20,000. The attendance at the third trial was 40,329.

Use Of The Apple

"Inlight, In Every Book," such is the inscription on a booklet being circulated by the Dominion Fruit Branch under the title of "Canadian Growth Apples." In this booklet, which can be had on application to the Dominion Fruit Branch, Department of Agriculture, Ottawa, are given no fewer than 100 suggestions as to the use of the apple in the home.

Real Butter

According to a distinguished dairyman at a recent farmers' convention, there has never been any really real butter, since neither used to make it in the old-fashioned up and down churn. Backward, churning backward, O Time, in your flight!—Boston Transcript.

There are 259 islands in the Fiji group.

Natural Resources Bulletin

Calcium Carbide Was A Discovery Made By A Canadian

The Natural Resources Intelligence Service of the Department of the Interior at Ottawa says:—

Among the great investors and discoverers of new processes that claim Canada as their birthplace, that of Thomas L. Wilson, the discoverer of calcium carbide should be included. Calcium carbide is a light gray, crystalline substance which is used in the production of a mixture of ordinary lime and coke to the intense heat of the electric arc. Some idea of what the intensity of this heat means may be obtained from the fact that the blast furnace for the production of iron or the Bessemer converter in which iron is changed to steel requires a temperature of from 2,500 to 4,000 degrees Fahrenheit whereas approximately 6,000 degrees of heat is required here for the formation of carbide becomes possible.

The most general use for calcium carbide is as an illuminant. When carbide is brought into contact with water acetylene gas is formed, and the gas produces a light that is very agreeable to the eye. Carbide, however, has many other uses. The acetylene torch that cuts through steel like a knife has its origin in the use of calcium carbide and acetylene.

Calcium carbide is also used as a fertilizer. It is used as a fertilizer for the production of nitrogen, the resultant product being calcium cyanamide. This element is an intensive fertilizer, enriching the soil and thus enabling it to produce greater crops. Thus we see that two uses of calcium carbide, a producer of coal, white and coke, a producer of coal, white and coke, a producer of coal, white and coke.

Canada's natural resources represent in other respects an immense wealth. The natural resources of Canada are represented in other respects an immense wealth. The natural resources of Canada are represented in other respects an immense wealth.

An Account Book For Farmers

A Simple Method of Keeping Account Of Profit and Loss on the Farm

The farmer who wishes to keep a simple method of bookkeeping, in order to ascertain with accuracy what his farm is earning, would do well to get a trial of the system devised by the Department of Agriculture at Ottawa.

The Publications Branch of that department has just issued a booklet known as the Farmer's Account Book, which will enable a farmer to keep track of his business with very little trouble and without any special knowledge. The book is designed to cover one year's business, and on the plainest plan the entries are to be made. It is at the service of the farmer with his farm, and does not include family and household expenses.

The first step is to make an account as possible a valuation, then to list all of the possessions in land, buildings, livestock, implements, feed and supplies.

The farmer then proceeds through the twelve months following in order in their respective places the amounts paid out and the sums received. The book is arranged so that central accounts can be kept for cattle, sheep, swine, poultry, crops, labour etc. The entries may be made any time of the year, and the book is a perfect time-saver.

At the end of the twelve months, a summary of the year's business is made out on the form provided. This will show precisely what the gain or loss has been on the year's business. It will also show the value of family labor, interest on capital, and interest on mortgages, if any.

It takes some people so long to find out what they want that the necessity for wanting is easier to exist before they get it.

Grand Falls, in Labrador, is the highest waterfall in the world. It is 2,000 feet high.

The official residence of British prime ministers for nearly 200 years has been No. 10 Downing Street, London.

Says Wheat Well Rooted

Experienced Grower Believes Harvest Prospects Are Most Favorable

The other day a shrewd, experienced wheat grower of this province made an observation that is worthy of more than passing attention. He said the annual associations regarding the harvest, he said that wheat is well rooted and that the prospects are most favorable. He said that the wheat is well rooted and that the prospects are most favorable.

There is no doubt that wheat is well rooted and that the prospects are most favorable. There is no doubt that wheat is well rooted and that the prospects are most favorable.

This year's crop is of the hardy, well-rooted variety, giving hope of increasing production as the ripening season progresses.

There are those who theorize that wheat will not be so successful this year. In certain regions, perhaps this theory has been handed down from the days of Noah, the man who bought the farmer surplus grain, storing it in warehouses for a period of crop failure. Experience in this west does not bear out the pessimistic view.

Depends on the circumstances of weather. This year, barring a little rain, the conditions are most favorable. The harvest prospects are the same—Winnipeg Tribune.

Increase Facilities For Handling Grain

Vancouver Port Will Be In Good Shape For 1924 Crop

Shipping and grain business need not worry over the handling of the 1924 grain crop through Vancouver, according to officials of the railways and of the Vancouver Harbor Board. The 1923-24 season, now closing, has had an elevator of 2,000,000 bushels capacity, and the new elevator, which is now under construction, will be completed by the end of the year.

According to Lord-Cat. G. H. Kirkpatrick, Chairman of the Harbor Board, Vancouver will have, on Oct. 1, 25 unloading piers, 35 elevators, 100,000 bushels of grain, and a storage capacity of 4,500,000 bushels. On Nov. 1, the capacity will be increased by four more piers and three more elevators. By Feb. 1, 1925, the capacity of the port will be 6,250,000 bushels, storage, 21 unloading piers, 47 elevators, and 17,000,000 bushels of grain.

Medal For New Plants

Plan to Encourage Origination of New Varieties of Plants

In order to encourage the origination of improved plants, the Canadian Planters' Association has designed a gold medal to be known as the C.P.G. medal, which is to be awarded each year to the originator of the best new plant. The award is to be made through the Canadian Horticultural Society. The medal which is of the form of a leaf, is to be awarded to the originator of the best new plant. The award is to be made through the Canadian Horticultural Society.

Reverend Dr. Van Loon, Pastor of Wesley Community Church, near Detroit, who had been missing for eleven days, was found suffering from exhaustion and with the letters "K.K.K." branded between his shoulder blades. He is at a hospital in a serious condition.

The Agricultural Wealth Of Canada Shows Remarkable Increase During Past Year

Solve Liquid Fuel Problem

Canadian Lignite Coal May Eventually Be Used For Propane Gas

At the world power conference in London one discussion in which the Canadian delegation participated was the liquid fuel problem which seems to have become very grave. Other speakers expressed the opinion that the chances of success for the commercial application of such processes were remote.

Mr. Hannel observed the work done in Canada concerning the carbonization of bituminous coal and said that Canadian lignites were different in chemical and physical properties from those of Europe.

The essence of the debate was that the days of the utilization of raw coal were numbered, and that the only way to save the coal was to extract the valuable by-products, leaving a residue suitable for domestic fuel purposes.

There was considerable discussion regarding the utilization of peat. The Canadian delegation agreed entirely with the opinion that there were processes depending upon mechanical pressing and artificial drying that would prove economical for many generations.

Expect Permit To Make Lignite Block

90 Tons Annual Output Anticipated By Alberta Company

An assurance that they will be given a permit to manufacture carbon black just as soon as they have complied with the regulations surrounding the issue of permits, has been received by officials of the Prairie Natural Resources Commission, Calgary, Alberta. In a letter from Hon. Charles Stewart, Minister of the Interior, one of the stipulations is that the wells owned by the company must be capable of producing a certain amount of gas, and a certain amount of coal.

The company announced that three wells have been drilled and another two are expected to be started almost at once. The company claims that they will be able to produce 90 tons of carbon black a year.

It takes 1,000 cubic feet of natural gas to make one and one-half pounds of carbon black. At the present time the wells owned by the company are expected to be running anywhere from 50,000 to 100,000 cubic feet of gas a day. The field is situated northeast of Calgary.

Sea Fish Catch

The Sea Fish Catch on the coast of the Maritime provinces for the month of May was 70,535.00 pounds, valued at \$1,861.29, compared with 73,939.60 pounds, valued at \$1,835.51 in May, 1922. Crabs, cod, haddock, hake, and salmon are noted, while there was a decrease in the catch of halibut, herring, mackerel, salmon, haddock and mackerel.

Exports of wheat to the U.S. during the month of May were double those for the same month last year, according to trade returns published by the Dominion Bureau of Statistics. The total quantity shipped across the line was 1,812,000 bushels, as compared with 916,000 for May, 1922.

The Game Cityways

Man Is something that rubs from the firm to the man who he pays four times as much for food as he got when he raised it.—Detroit News.

A constabulary was constantly increased to a man in the constabulary kept shouting out, "Liar!" After about the third repetition, the speaker paused and said his own life in the constabulary. If the constabulary is in the constabulary, he said, "will be good enough to tell his name in front of me, shouting out his name. I am sure we shall all be pleased to meet his acquaintance."—Christian Register.

There will be an afternoon service in St. Monica's Church on Sunday, July 27th, at three o'clock. Leslie D. Brichler, of Clive, will conduct the service.

Plans are completed for the third annual Masonic picnic to be held at Jewell's Grove, Buffalo lake, on Wednesday, July 30th. Alis, Bashaw and Mirror lodges have the arrangements in hand.

Dr. R. A. McCormack, Dentist, will be at Alis, Monday, July 21st, noon, to Wednesday, July 23rd; and at Imperial Hotel, Mirror, Thursday, July 24th, to Saturday, July 26th, at noon.

Henry Neis, who lives east of Bashaw, suffered a painful accident last week when a horse he was riding, stumbled and fell. Mr. Neis was thrown under the horse and was hurt internally. Medical attention was given and an improvement is reported in his condition.

The death of L. O. Jewell occurred at Des Moines, Iowa, on July 17th. The deceased was a brother of D. M. and A. Jewell, of Mirror, and was in his 62nd year. He is survived by his widow, a son and a daughter. The news of his sudden death came as a shock to the Jewell brothers here.

Mrs. W. Hodgson and her daughter, Mrs. R. Skinner, and granddaughter, Viola Hodgson, of Exeter, Ont., are visiting with Mr. and Mrs. J. F. Flewelling. Mrs. Flewelling is a daughter of Mrs. Hodgson's. The first two mentioned were visitors in Mirror six years ago.

The following have returned from their motor trip through the Rockies, via the Banff-Windermere trail: Mr. and Mrs. E. J. Cairns, Mr. and Mrs. E. E. Estell, Mr. and Mrs. D. M. Jewell, Mirror, and Mr. and Mrs. R. Lowe, Alis. The travellers report good fishing and an excellent outing.

Carl McCormack has been successful during the past week or two in winning a number of prizes at the Calgary and Edmonton exhibitions for paintings and art drawing executed by him. At Calgary Mr. McCormack won three firsts and two seconds and at Edmonton he was awarded the special prize given by the McDermid Studio.

Here and There

The value of Ontario's milk production for the first quarter of the present year, as shown by a report of the Department of Mines, has increased \$233,000 over the corresponding quarter of last year, the total being \$1,578,151 and \$2,441,553 respectively. Silver was the only metal of importance to record decreased production during the period under review.

Among the passengers sailing on the Canadian Pacific liner "Montaurier" for England on July 15th, was Mr. Beatty, Chairman and President of the Canadian Pacific Railway. While in England, Mr. Beatty is scheduled to address the Associated Advertising Clubs of the World on July 17th on the subject of "Building an Empire with Advertising."

Excellent reports as to the hunting in the Carleton district of British Columbia are being received. F. W. Pridham and Fred Shaver recently returned from a month's sport in that district with an excellent specimen of grizzly bear weighing about 1,400 pounds. They saw moose, caribou, deer, black bear, pheasants and grouse, and consider the district a hunter's paradise.

Addressing the annual meeting of the Royal Navy, from the special service squadron headed by H.M.S. Hood, enjoyed a trip through the Rockies over the Canadian Pacific lines while their ships were anchored at Vancouver recently. The sailors, who made a point, in true naval style, of seeing and doing everything, were enthusiastic over the scenery at such show-places as Banff and Lake Louise, which they declared the most beautiful they had seen in all their world cruise.

On June 18th Winnipeg, Man., celebrated the fiftieth anniversary of its incorporation. From a struggling frontier village of the 70s, Winnipeg has forged into the position of a great and largest city of the Dominion, with continental reputation as a railroad center. It is the Gateway of the West and 100,000,000 bushels of prairie grain pass through it to the head of the lakes, whence it goes to the markets of the world.

Twenty-five officers and 200 men of the Royal Navy, from the special service squadron headed by H.M.S. Hood, enjoyed a trip through the Rockies over the Canadian Pacific lines while their ships were anchored at Vancouver recently. The sailors, who made a point, in true naval style, of seeing and doing everything, were enthusiastic over the scenery at such show-places as Banff and Lake Louise, which they declared the most beautiful they had seen in all their world cruise.

To add encouragement to the raising of high-class wine, which is being fostered by the government of Manitoba, Saskatchewan and Alberta, the Canadian Pacific Railway is awarding a championship cup to the boys and girls of the province. The cups are for annual competition, but will become the property of the club if won for three years in succession. Medals will be awarded individual members. This year the winning teams resident on the Company's lines will also be granted a Free trip to the Royal show at Toronto.

The Arts, Science and Letters Society of the Province of Quebec recently sent a questionnaire to the various parishes of Quebec and Montserrat counties, seeking information as to the age and size of families residing in these territories. It was discovered that the family of Jeanne Bedard had remained on the same land at Charlebourg since 1629, that the largest family in Montserrat was that of Hector Labreche, of St. Jean Island of Orleans, who has 20 children living, and that Joseph Gagnon, of St. Pierre, Island of Orleans, has the largest number of living descendants, 215.
